Company Profile

About Us

Fleetrak Telematics is an innovative fleet management and tracking solutions company. We are a Zimbabwean based and registered company with branches in Chiredzi and Harare. Fleetrak Telematics was created to tackle the growing challenges in automobile security and fleet management faced by local transportation companies, small and medium sized businesses and farmers in general.

Our solution is to provide a highly customizable, feature-rich products designed to meet the various requirements of every sector, in a simple and affordable way.

Fleetrak Telematics brings to you high quality GPS devices and GPS Fleet Management Solutions to cope with your transport, distribution and security tracking needs in real time.

Our innovative tracking software gives you the power to monitor your valuable assets and vehicles from any computer or mobile phone and tablet.

Use our secure, web-based software to gather reports about up-to-the-second route information, stops and more. Our GPS fleet management system is applicable in any type of tracking scenarios, including truck, van and car tracking, personal tracking, bikes and various types of equipment and machinery

Our Strength

- Our innovative hardware features driver behaviour, accident buffer and advanced anti-tamper technology as standard, offering our customer the widest range of benefits in the marketplace.
- We offer highly scalable solutions with additional hardware options that address a variety of challenges and meet precise business and operational requirements. This enables better-informed strategic decision making, using highly flexible reporting that is simple and easy to use, to achieve fleet efficiencies and reduce costs.
- Our A-Team is the backbone of who we are
- A fully qualified technical team with wealth of experience across all types of vehicles
- Exceptional, personal Customer service

Mission

Our Mission at Fleetrak Telematics is to become the leader in applying innovation, technology and service quality to provide consumers and businesses with the best security and protection through telematics solution, maintaining high-quality standards in our services, creating an increase in our client's profit, efficiency and safety

Vision

To be the standard in providing digitalized and data-driven IoT solutions to maximize safety, security and optimum performance and to grow toward our mission

Core Values

Innovation | Customer Satisfaction | Reliability | Efficiency | Affordability | Promptness | Simplicity

Why Choose

FLEETRAK Tracking System

- We provide active GPS Fleet Management Solutions.
- We have personally used the products and experienced their benefits.
- We provide services at reasonable costs.
- Technical experience in tracking for over 15 years.
- Cloud based Services.

Motorcycles

Motorcycles can get you into places where other vehicles cannot, it might be the fastest method of transportation during traffic hours. This commodity has one disadvantage – it is an easy target for thieves. In most cases quick reaction to theft attempt could save your valuable asset. With our solution you will always have current location, receive warnings if motor bike is being moved or if tracker was disconnected from battery.

Light Vehicles.

shutterstock.com · 1721339608

There have been at least 7 million cases of stolen vehicles around the world every year and this number keeps growing every day; figures in traffic accident statistics are even greater. Real time tracking, warnings when theft attempt or crash is detected, with possibility to trace accidents – all this to determine culprit and reduce expenses when unforeseen event occurs.

Heavy Duty Transport

- LOGISTICS Modern day logistics require a lot of information for business optimization, it is not enough to get current GPS coordinate of your vehicle location. With fuel consumption, driven distance and many other parameters you are able to monitor and regulate your fleet resources, this way all expenses would be accounted. With solution for driver activities monitoring, you will have full control of your driver.
- AGRICULTURAL VEHICLES
- CRANES
- CONSTRUCTION VEHICLES

Water Transport.

It might seem that motorboats, ships or personal watercrafts are items of luxury, but nowadays more and more people are acquiring such type of technology. To ensure safety we can offer you usual tracking solution designed for water transport.

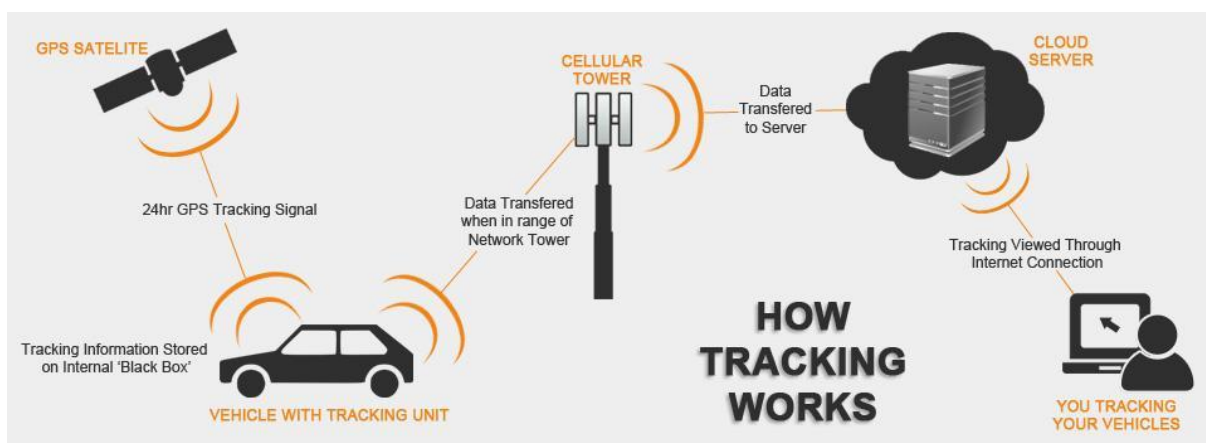

Our Main

Priorities to our clients

- Carrying out all obligations completely and unconditionally.
- Providing the client with a comprehensive solution to any issue.
- Simplifying and automating the client's workflow.
- Unconditionally adhering to the agreed time frame of implementation without additional delay.
- Providing a return on the customer's investment within the first month of usage, thanks to our favourable prices.
- Providing instant solutions to problems.

How GPS

Fleet Management Works

Benefits

for Transporters

Whether you have a small or medium sized fleet in your business, you will face similar operational challenges.

Close partnership

- We adapt to our partners' business models and culture and build trust with real examples of business practices. To make the partnership stronger, we focus on long-term, not just short-term contracts.

Knowledge and experience

- Working closely with end-users allows us to identify their needs first hand and create solutions that solve real, everyday problems. Working with businesses in Zimbabwe has given us extensive experience and deep understanding of different business cultures.
