

*You`ve seen the others, why not experience the new standard. Eliminate the guesswork with the smartest tracking in the industry*

## Who are we?

Fleetrak Telematics is an innovative fleet management and tracking solutions company. We are a Zimbabwean based and registered company with branches in Chiredzi and Harare

## What do we do?

- Fleetrak Telematics brings to you high quality GPS devices and GPS Fleet Management Solutions to cope with your transport, distribution and security tracking needs in real time.
- We offer a solution that is highly customizable, feature-rich products designed to meet the various requirements of every sector, in a simple and affordable way

### Our Mission

Our Mission at Fleetrak Telematics is to become the leader in applying innovation, technology and service quality to provide consumers and businesses with the best security and protection through telematics solution, maintaining high-quality standards in our services, creating an increase in our client's profit, efficiency and safety

### Our Values

- Innovation
- Customer Satisfaction
- Reliability
- Efficiency
- Affordability
- Promptness
- Simplicity

### Our Vision

To be the standard in providing digitalized and data-driven IoT solutions to maximize safety, security and optimum performance and to grow toward our mission

### Our strength

- Our innovative hardware features driver behaviour, accident buffer and advanced anti-tamper technology as standard, offering our customer the widest range of benefits in the marketplace.
- We offer highly scalable solutions with additional hardware options that address a variety of challenges and meet precise business and operational requirements. This enables better-informed strategic decision making, using highly flexible reporting that is simple and easy to use, to achieve fleet efficiencies and reduce costs.
- Our A-Team is the backbone of who we are
- A fully qualified technical team with wealth of experience across all types of vehicles
- Exceptional, personal Customer service

## Start the Process of Benefiting from a Vehicle Tracking System

Millions around the world are using GPS vehicle tracking systems to monitor fleet and personal vehicles.

Business users are realizing the benefits the systems provide in running smoother and more efficient logistics operations, while individual users are realizing the peace of mind GPS trackers provide keeping them informed that their family members are safe, and the vehicles secured.

Having the awareness of where your drivers, vehicles, and equipment are at any given moment allows you to respond more rapidly to emergencies. It also enables you to make sure you send the right vehicles, people, and resources to the right places

More simply, the number one reason companies need real-time location tracking is for an anti-theft system. Many businesses see an instant, massive return on investment (ROI) even in one instance of recovering a stolen vehicle or asset.

The following features of FLEETRAK`s GPS tracking system are just the tip of the iceberg when it comes to what this technology can do.

Some factors to consider are, how easy-to-use the software is, whether or not the provider offers a mobile app, and how robust the geofence capabilities are.

# WHY SHOULD YOU CHOOSE FLEETRAK?

## LOCAL COMPANY

- Local office and workshop
- Save time
- Quick orders, repairs and installations
- Strengthen your local economy
- Create more local jobs

## ADVANCED FITMENT TECHNIQUES

- Get the best possible assurance that the tracking device will not be found or disabled in a theft situation.
- No scratches, dents nor anything missing in your vehicle
- Adhere to the highest standards of hygiene.

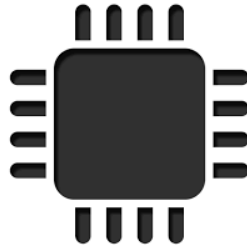

## WIDE RANGE OF SERVICES

- Fleet and asset management
- Trailer tracking
- GPS speedometers
- Fuel Management
- Video Telematics

## SUPERIOR HARDWARE

- We use the best GPS trackers from superior brands like Teltonika, Galileosky and Concox. Nothing but the best
- Our devices go through various testing processes before they are sold to you

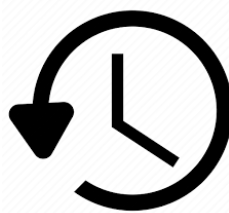

## MAINTENANCE SCHEDULING

- This functionality means spotting new maintenance issues, addressing them immediately, and ensuring that preventive maintenance is scheduled and completed on time.
- Vehicle downtime can severely impact your business if one or multiple vehicles are out of commission for long periods.
- Schedule maintenance for tasks such as vehicle service, licence and insurance expiry, fitness test etc
- schedule maintenance work based on time, engine hours, and mileage

## HISTORY

History can be stored for a basic of 6 months and has an option to be extended

## GEO FENCE

Geofencing is a way to define a geographical zone to track if your vehicles are leaving or entering that zone.

The Fleetrak system enables you to define prohibited or mandatory geographical zones by simply using our drawing tool. You can also set up a 'custom location', such as your employee's home or your client's site.

Geo fence when:

- Vehicles need to be onsite overnight for insurance purposes
- Your company deliver materials to a major city, but you want driver to avoid rush hour traffic(set as prohibited zone)
- You want to ensure drivers stay on the job and do not go home during lunch
- Your staff are working on a customer site remotely, and you want to make sure vehicles stay within that
- You want to prevent unauthorised use of vehicles at the weekend(set as mandatory zones over the weekend)

## CUSTOMIZABLE ALERTS

Receive real-time notifications regarding driving behavior to vehicle diagnostics

Custom alerts range from:

- Odd-Hours Alerts
- Excessive Times
- Speeding Alerts
- Vehicle Maintenance Due
- Impact/accident alerts
- Enter and Exit Geo zones
- Ignition alerts
- Sudden acceleration, harsh braking, and harsh cornering
- Power loss
- Connection lost

# WHY SHOULD YOU CHOOSE FLEETRAK?

## SECURITY & SAFETY

Our GPS tracking encourages safe driving by providing real-time tracking of key driving data of your vehicle. It's a tool to improve performance and grow your business. Get insights which include data from speeding, rapid acceleration, and harsh braking to the average time spent at jobsites. This level of information acts as a deterrent to poor driving, resulting in improved safety and security for your passengers and your vehicle.

## REAL TIME TRACKING

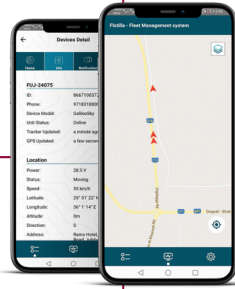

Location tracking is at the foundation of fleet management. Some vehicle tracking providers only offer periodic updates of their GPS tracking devices eg-only send data every two minutes, three minutes, or even longer. With Fleetrak :

- Get real time glitch-free tracking using guaranteed and tested GPS hardware
- Get on the second data with accurate location, speed and direction

## MOBILE APPS

We offer a multi-platform software

- Our system works on desktop & laptop, as well as tablets and smartphones (iOS and Android)
- Seamlessly switch from one device to the other
- Do not be restricted in your business operations

## ANALYTIC DASHBOARD

View the units with leading engine hours and mileage or their statuses, the analytic dashboard offers you all the precious insights

- Get powerful, fast glances at your fleet's productivity and movements

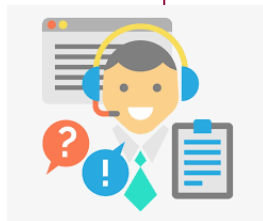

## SPECIAL SOFTWARE

- Cutting-edge fleet management software
- Precise positions and easy operation characterize the system.
- Map display, customizable services.
- Software easily integrates most hardware devices

## CUSTOMER FOCUS & SUPPORT

- We offer on-going customer support that means no matter what the time is, you will get instant and reliable support service.
- We offer exceptional, personal Customer service
- FLEETRAK Telematics are there for you, providing ongoing support throughout the lifetime of the contract.

## CANBUS INTEGRATION

Get vehicle performance data in real-time from the vehicle computer box for monitoring and analytics

## ADVANCED REPORTS

- A wide range of data-rich, customizable reporting tools.
- Receive daily, weekly or monthly (as you prefer) report automatically via email
- Avoid logging into the app and go through your old reports manually
- View speed and safety reports for your drivers or get details on kms driven per trip -
